## A GUIDE TO YOUR SEPTIC SYSTEM

Read and follow the Dos and Don'ts list provided below:

DO:	DON'T:		
☐ Conserve water to reduce the amount of wastewater that must be treated and disposed.	<ul> <li>Flush sanitary napkins, tampons, disposable diapers, condoms, wipes, cat litter, and such</li> </ul>		
$\square$ Repair leaking faucets and toilets promptly.	products into your system.		
<ul><li>Only discharge biodegradable wastes into system.</li></ul>	<ul> <li>Dump solvents, oils, paints, thinners,</li> <li>disinfectants, pesticides, or poisons down the</li> <li>drain. These can disrupt the treatment process</li> </ul>		
□ Divert down spouts and other surface water	and contaminate groundwater.		
away from your soil treatment area.	$\square$ Dig in your soil treatment area or build anything		
<ul> <li>Keep your septic tank cover accessible for tank inspections and pumping.</li> </ul>	over it.		
	☐ Plant anything over your soil treatment area		
☐ Have your effluent screen inspected and cleaned once a year.	<ul><li>except grass.</li><li>Drive or park vehicles over your soil treatment area or compact soil in any way.</li></ul>		
☐ Have your septic tank pumped regularly			
inspected for leaks and cracks.	☐ Use a garbage disposal unless your septic tank		
$\square$ Call a professional when you have problems.	was sized to handle the required sludge storage		
Compost your garbage or put in it the trash instead of putting it down the sink.	volume.		
☐ Make sure any water conditioning or softening equipment is approved for the use of your system and that it is properly set for your water conditioning/softening needs and operating correctly.	SAFETY FIRST!		
	<ul> <li>NEVER physically enter a septic tank or other parks of the treatment system. Call your service provider!</li> <li>Keep access areas locked at all times to prevent unauthorized entry.</li> </ul>
